Personal statement

AI/ML student (CGPA 3.95/4.00) and AWS Certified AI Practitioner who builds machine learning systems end to end, from graph neural networks to Flask and FastAPI backends. Interned at iLeaf Solutions working with Python, PyTorch and AWS AI. I care about honest evaluation and clean engineering. Seeking a **software engineering or AI/ML internship**.

Skills

Machine learning	**PyTorch**, **Graph Neural Networks**, Neural Networks, NLP, Generative AI, Predictive Analytics, NumPy, Pandas
Cloud, backend & data	**AWS SageMaker**, Amazon Bedrock, AWS AI Services, **Flask**, FastAPI, SQLAlchemy, MySQL, SQLite
Languages & tools	**Python**, C++, SQL, HTML/CSS, Git, GitHub, Ubuntu, ESP32, Arduino

Work history

Apr 2026 – May 2026

SOFTWARE DEVELOPMENT INTERN
iLeaf Solutions Pvt. Ltd., Kochi, Kerala

- Worked in a sprint-driven commercial team, building hands-on with **Flask, PyTorch and AWS AI** across backend systems and databases.
- Debugged core architecture setups, helping speed up code delivery and reinforcing sound design patterns.
- Practised structured version control and the full software development lifecycle, from development to production.

Education

Jun 2025 – May 2029
B.TECH ARTIFICIAL INTELLIGENCE
Christ University, Bangalore
CGPA 3.95 / 4.00

Apr 2025
SENIOR SECONDARY, PCMB
Rajagiri Christu Jayanthi Public School, Kochi

SCHOOL
Chavara CMI Public School, Pala

Projects

SENTRIX: BITCOIN ADDRESS RISK SCORING
Python · PyTorch Geometric · GraphSAGE · NetworkX

- Flags illicit transactions among 200,000+ in the Elliptic Bitcoin graph by adding Personalized PageRank proximity features to 165 raw features and training a GraphSAGE classifier.
- Raised illicit-class **F1 from 0.53 to 0.69** and **AUC from 0.90 to 0.96** across 3 seeds, using temporal splits and leave-one-out seeding to prevent leakage.
- Traced the train-to-test gap to temporal drift rather than overfitting, and documented the limitations.

IOT FALL DETECTION & HEALTH MONITOR
ESP32 · C++ · Arduino · Blynk

- Wearable on an ESP32 with motion (MPU6050) and heart-rate (MAX30102) sensors, GPS and an OLED display.
- Blynk IoT sends automated emergency alerts when a fall is detected.

MULTI-AGENT AI RESEARCH
LLM agents · Research

- Researched contextual decision-making in clusters of LLM agents in low-infrastructure settings.
- Evaluated uses in precision agriculture and edge healthcare.

Certification

AWS Certified AI Practitioner
Amazon Web Services
Aug 2026 – Aug 2029

Languages

English, Proficient (C2)
Malayalam, Native

Currently learning

AWS ML Engineer Associate (MLA-C01) · Docker & Kubernetes · Google AI Data Analytics · Oracle Java certification · Math behind AI/ML
