✉️ ryan.j@btech.christuniversity.in
🌐 github.com/RyanJJaison

TECHNICAL SKILLS

LANGUAGES
C++, Python, SQL, HTML/CSS

FRAMEWORKS & TOOLS
Flask, Git, GitHub, Ubuntu, ESP32, Arduino

DATABASES & ORMS
MySQL, SQLite, SQLAlchemy

DATA SCIENCE
NumPy, Pandas

EDUCATION

Christ University
B.Tech CSE (AI & ML)
CGPA: 3.95 / 4.00

LANGUAGES

English, Malayalam

ABOUT ME

Computer Science student specializing in Artificial Intelligence and Machine Learning. Possesses a strong execution foundation in backend architectures, relational databases, and physical computing systems. Proven track record deploying full-stack Flask frameworks and complex sensor networks. Seeking a software engineering internship to anchor agile product development teams.

PROFESSIONAL EXPERIENCE

Ileaf Solutions Pvt. Ltd.
1 Month

Software Development Intern

- Collaborated closely within a fast-moving, commercial engineering environment supporting active sprint goals.
- Debugged core architecture setups, accelerating code delivery cycles and solidifying software design patterns.
- Gained hands-on familiarity with structured version controls and end-to-end SDLC production parameters.

FEATURED PROJECTS

Flask Task Management System

- Built a full-scale CRUD web engine utilizing the Flask micro-framework to standardize application workflows.
- Implemented a dynamic database-agnostic layer using SQLAlchemy, ensuring quick hot-swaps between SQLite and production-scale MySQL environments.

IoT Fall Detection & Health Monitor

- Designed a micro-wearable system via an ESP32 micro-controller integrating biometric data arrays (MPU6050, MAX30102), GPS spatial coordinates, and real-time OLED rendering interfaces.
- Configured secure automated web hooks using Blynk IoT infrastructure to transmit zero-latency emergency fallback protocols.

Autonomous AI Multi-Agent Research

- Researched contextual decision-making models across clustered LLM agents operating within infrastructure-sparse ecosystems.
- Evaluated application paradigms for automated diagnostic routing within modern precision agriculture and edge healthcare telemetry.
